# CONTINUUM® PUMP series

Helical rotors pumps for high pressure  
and no noise application

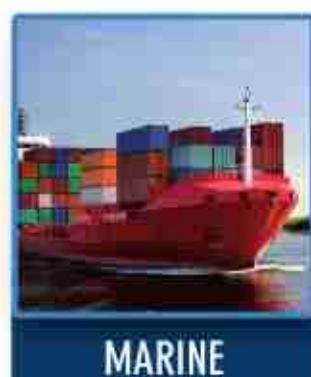

The new generation of gear pumps for  
**NO PULSATION & NO NOISE**

INDUSTRIAL

MOBILE

MARINE

## Achieves better efficiency, lower production cost, better life quality for the industrial world. *Ottiene alti livelli di efficienza, ridotti costi di produzione ed una migliore qualità del lavoro.*

Reducing noise in the workplace has become a necessity for many companies. By now most companies have recognized noise as a cost weighting on the economics of their businesses. Noise pollution remains a serious problem to be solved for both stationary and mobile machinery. Hydraulic pumps, above all those for high pressure, entail unacceptable noise and/or vibration levels in many different applications.

Up to now the noise problem has always been approached in the only possible way: with secondary and expensive activities such as using pulsation dampers, hoses, damping rails and rings; encapsulating the hydraulic components or the entire system and so on.

SETTIMA decided to start to design a new gear pumps generation capable to reduce as much as possible the acoustic emissions and the consequent vibration level. Some years ago the result was the **Continuum® pump series**, able to reduce down to 52 dB(A) the normal operation noise.

Today SETTIMA presents the new generation of **Continuum® pumps**, silent as always, but much more efficient and with longer lifetime even at heavy duty, at all pressure and speed ranges.

The most important economic benefits of using **Continuum® pumps** are:

- very low pump pulsations reduce dramatically also vibrations with no dispersion of energy,
- saving money respect to the more expensive traditional pumps such as piston pumps and internal gear pumps,
- high volumetric efficiency, also at very low speed, contributes to cost reduction and also enables the pump to be driven by motor at a variable velocity with consequent energy saving,
- cost saving by eliminating second noise reduction measures,
- keeping the same external dimensions of gear pump, with no necessity to redesign the system in case of replacement.

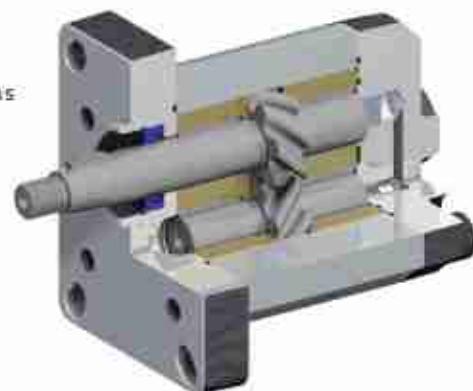

## COMPETITIVE ANALYSIS

**Continuum® pump** is a valid alternative to silently replace different traditional solutions of noisy high pressure pump.

**Continuum® pump** can replace the following types of high pressure pump:

- External gear pumps
- Internal gear pumps
- Fixed displacement vane pumps
- Fixed displacement piston pumps

Please contact Settima for all information about any possible replacement.

## ORIGIN OF NOISE AND VIBRATIONS KNOCKED DOWN BY CONTINUUM® PUMP *LA POMPA CONTINUUM® HA ELIMINATO LE ORIGINI DEL RUMORE E DELLE VIBRAZIONI*

The typical sound emissions of gear pumps have two distinct origins: mechanical noise and hydraulic noise. The mechanical noise is what can be expected from any pair of gears. The hydraulic noise, however, is generated by the perturbations of fluid pressure through the pump. This noise and/or vibration comes from three basic components:

- cavitation, that can cause serious noise in addition to structural damage to mechanical components
- the peak pressure that arises from trapping of fluid between the top and the bottom of the tooth,
- the "ripple" or the flow pulsation during meshing that causes pressure pulsation.

The continuous contact helical rotor **Continuum® pump** has solved these problems with sophisticated and efficient systems.

## THINK DIFFERENT: THE SILENT AND UNIQUE REVOLUTION OF CONTINUUM® PUMP *UNA RIVOLUZIONE SILENZIOSA: LA POMPA CONTINUUM®*

As for classic gear pumps, the transport flow is perpendicular to the axes, but the rotors profile, specially developed and internationally patented, does not trap any volume since the helical design of the profile plays the role of completing an overlap, making a gentle transmission of fluid resulting in a dramatic reduction of pulsation. There is just a single point of contact between the profiles

- The screw step.
- The inner force balancing.

## MANUFACTURING ACCURACY IN ANY DETAILS

*MASSIMA ACCURATEZZA NEI DETTAGLI*

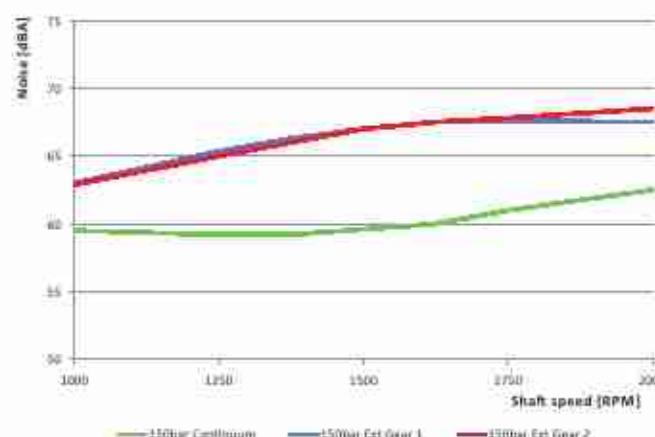

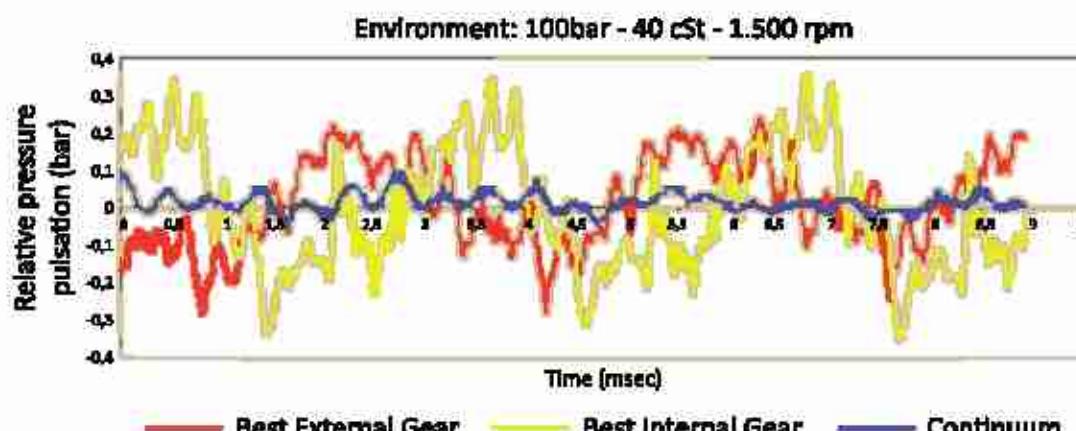

**SETTIMA** produces hydraulic pumps since over thirty years, achieving a high level of competence and accuracy in the manufacture of high-precision pump drives. Together with top production machineries, efficient test environments, 3D drawing capability and special materials for rotors and bushings, **SETTIMA** constantly achieves products of high quality that is the industry standard.

## CONTINUUM® PUMP ADVANTAGES

*VANTAGGI DELLA POMPA CONTINUUM®*

- Low noise also at high speed (up to 6.500 RPM).
- Average of 15 dB(A) less noisy than standard external gear pumps.
- Reduced noise level for the machine operator and surroundings.
- Cost saving by eliminating second noise reduction measures.
- Easy to replace thanks to compatibility with all external gear pumps.
- Helps meet legal noise requirements.
- Continuous variable flow rate (0% to 100%).
- Unidirectional pump and/or bi-directional pump/motor.
- Intermittent operation at high pressure & low speed.
- Allowed to be driven by servo motors or asynchronous motors.
- High volumetrical efficiency.
- Fast reverse RPM allowed: CCW max < 400.
- Response time < 100 ms due to very small internal mechanical inertia.

## Technical characteristics / Caratteristiche tecniche

**SPECIAL HELICAL ROTORS – CONTINUUM®** represents an innovative and revolutionary gear pump. The patented profile of the **Continuum®** rotors permits just a single point of contact between gears: this results, together with a particular screw step and inner force balancing, in the total absence of trapped and compressed oil, and leads to no noise and no pulsation.

**HIGH PRESSURE – CONTINUUM®** has been designed for high pressure, high speed and heavy duty.

**TANDEM GROUP – CONTINUUM®** can be also assembled as a double pump, connecting two pumps from different groups: from group 1 to group 4.

\* Please Contact Settima for SX counter clockwise optional rotation.

Contattare Settima per rotazione SX opzionale.

DIRECTION OF ROTATION / SENSO DI ROTAZIONE

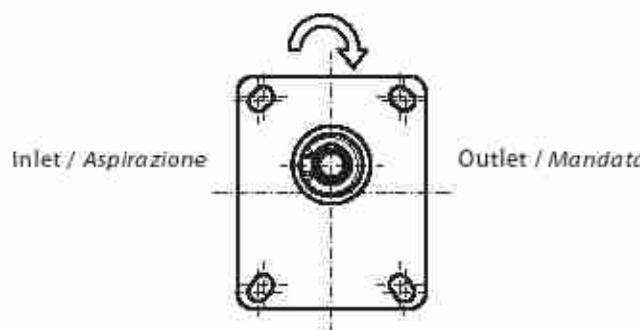

**Continuum®** pumps are available with right rotation as standard configuration and left rotation as optional configuration. Right hand rotation means that, when standing in front of the pump, with driving shaft towards to the observer, the pump is rotating clockwise (DX). The other way around with left hand rotation, counter clockwise (SX).

Le pompe **Continuum®** sono fornite con la configurazione standard di rotazione destra. Opzionale la rotazione sinistra. Con rotazione destra (DX) si intende che, guardando la pompa frontalmente, con l'albero conduttore sporgente verso il punto di osservazione, la rotazione sarà in senso orario, con il lato mandata sulla destra e il lato aspirazione sulla sinistra della pompa. Viceversa per quanto riguarda la rotazione sinistra (SX).

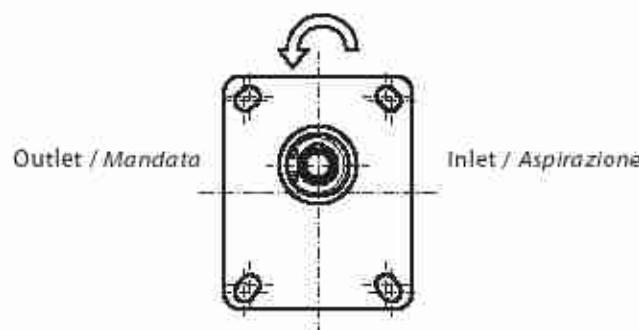

**Continuum®** pumps, despite the type of configuration, can rotate to the opposite side if the pressure is not higher than 10% of maximum continuous pressure (check the Technical Characteristics table).

Le pompe **Continuum®**, qualunque configurazione di rotazione abbiano, possono ruotare in senso inverso a pressioni non superiori al 10% della massima pressione continua (verificare nella tabella delle caratteristiche tecniche).

DX: Clockwise rotation / Rotazione destra

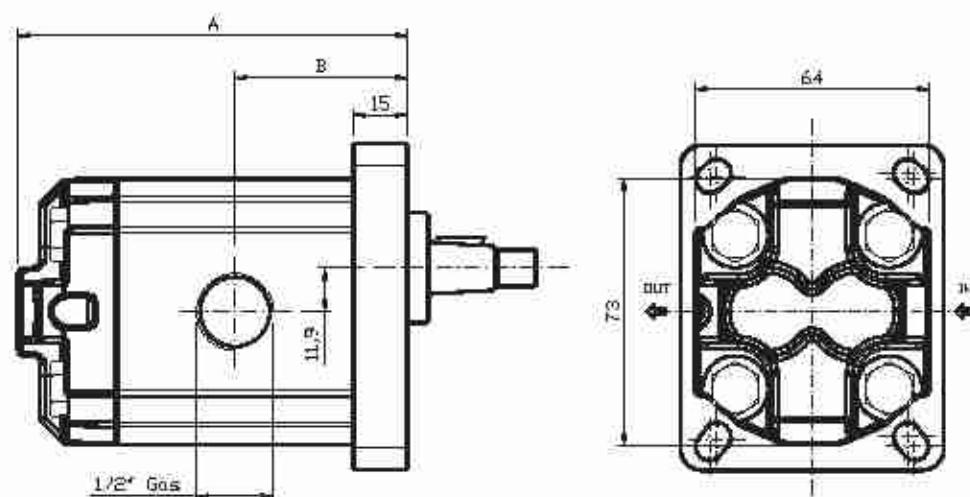

SX: Counter clockwise rotation / Rotazione sinistra

**Continuum®** pumps are suitable for multiple setups, whereby the drive shaft of the first pump is extended to a second and even a third **Continuum®** pump.

Each pump is connected to another by means of coupling. Each pump has its own suction port. Basically the technical specifications of single pumps apply also to multiple setups.

The maximum speed is determined by the highest pump speed rate in use.

In case of multiple setup configurations, it is recommended to use the largest displacement for the first pump.

The front pump may be equipped with different types of flange and shaft.

\* Please Contact Settima for SX counter clockwise optional rotation.  
 Contattare Settima per rotazione SX opzionale.

## DI ROTAZIONE

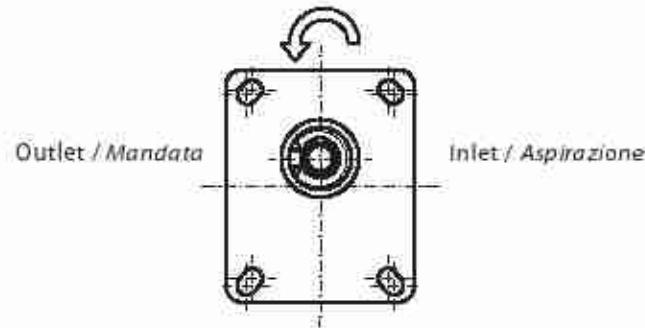

Right rotation as standard configuration and left rotation as optional configuration. Right hand rotation means that, when standing in front of the pump, with driving shaft towards to the observer, the pump is rotating clockwise (DX). The other way around with left hand rotation, counter clockwise (SX).

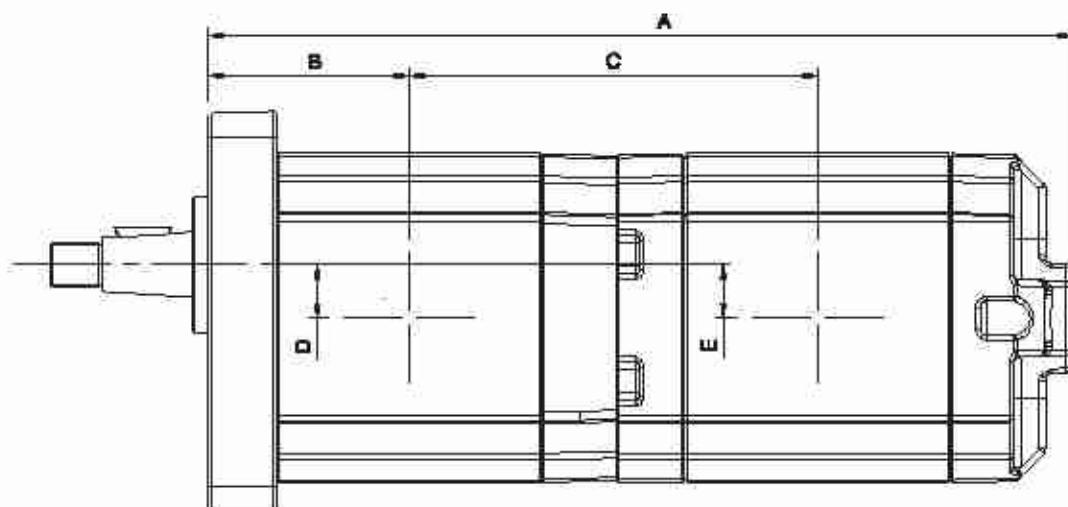

Le pompe Continuum® sono fornite con la configurazione standard di rotazione destra. Opzionale la rotazione sinistra. Con rotazione destra (DX) si intende che, guardando la pompa frontalmente, con l'albero conduttore sporgente verso il punto di osservazione, la rotazione sarà in senso orario, con il lato mandata sulla destra e il lato aspirazione sulla sinistra della pompa. Viceversa per quanto riguarda la rotazione sinistra (SX).

DX: Clockwise rotation / Rotazione destra

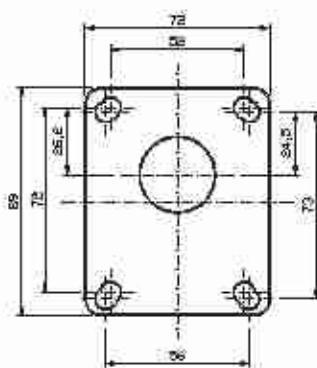

SX: Counter clockwise rotation / Rotazione sinistra

### Available flanges and shafts for GR38

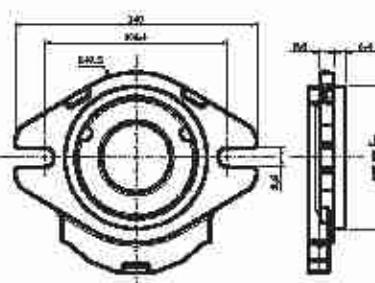

Flange ed alberi disponibili per GR38: 2-BK7 G; SAEA-T11; SAEA-AC; 2C4

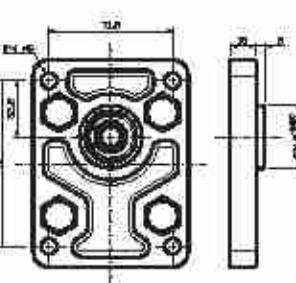

Type flange 2BK7-G  
Flangia tipo 2BK7-G

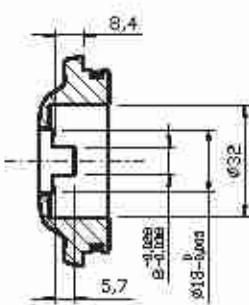

Type flange SAEA-AT11  
Flangia tipo SAEA-AT11

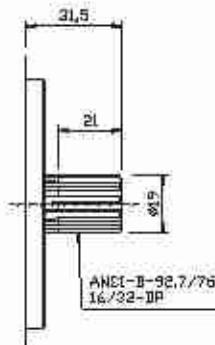

Type flange SAEA-AC  
Flangia tipo SAEA-AC

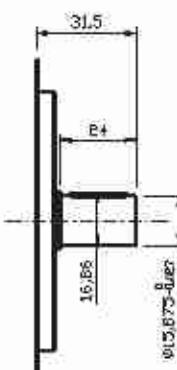

Type flange 2C4  
Flangia tipo 2C4

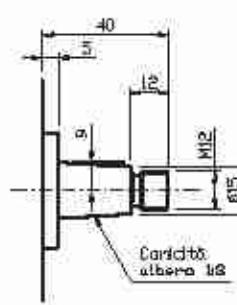

Type shaft 2BK7-G  
Albero tipo 2BK7-G  
Max torque / Coppia max 110 Nm

Type shaft SAEA-AT11  
Albero tipo SAEA-AT11  
Max torque / Coppia max 210 Nm

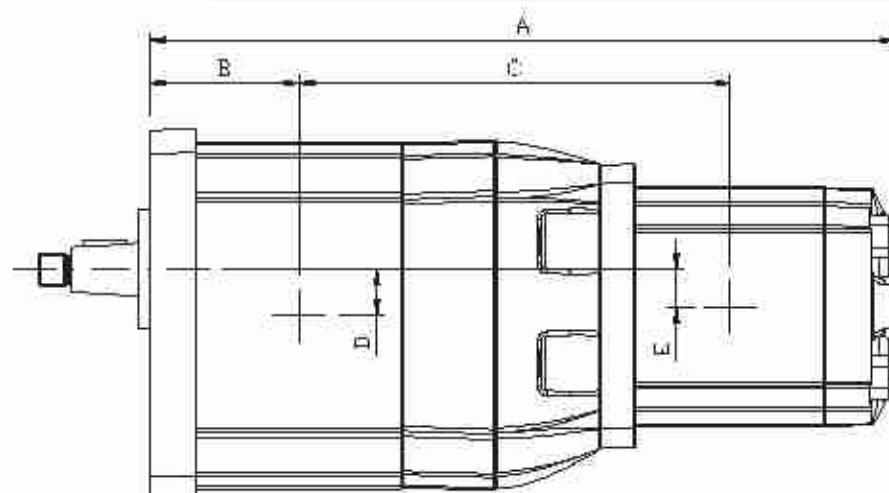

Type shaft SAEA-AC  
Albero tipo SAEA-AC  
Max torque / Coppia max 140 Nm

Type shaft 2C4  
Albero tipo 2C4  
Max torque / Coppia max 210 Nm

### Available flanges and shafts for GR47

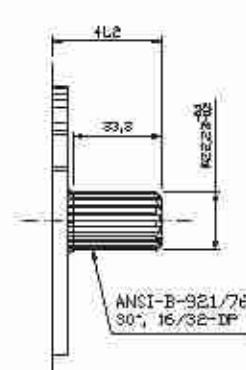

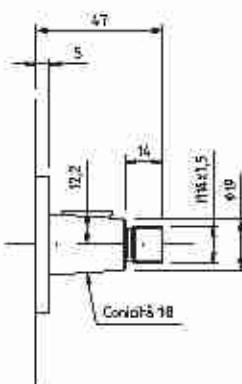

*Flange ed alberi disponibili per GR47: 3-C9; SAEB-AC; SAEB-T13*

Type flange 3-C9  
Flangia tipo 3-C9

Type flange SAEB-AC  
Flangia tipo SAEB-AC

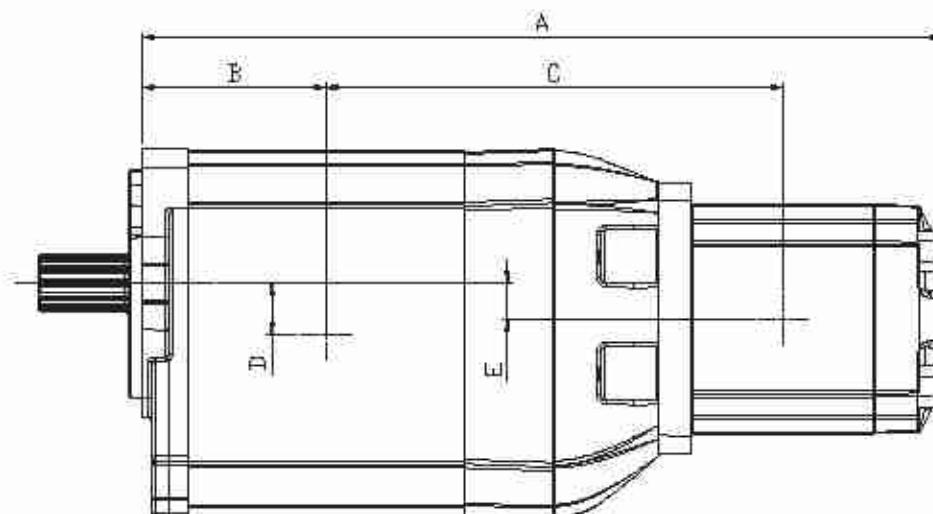

Type flange SAEB-T13  
Flangia tipo SAEB-T13

Type shaft 3-C9  
Albero tipo 3-C9  
Max torque / Coppia max 320 Nm

Type shaft SAEB-AC  
Albero tipo SAEB-AC  
Max torque / Coppia max 450 Nm

Type shaft SAEB-T13  
Albero tipo SAEB-T13  
Max torque / Coppia max 600 Nm

### Available flanges and shafts for GR55

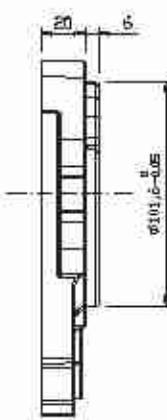

Flange ed alberi disponibili per GR55: SAEB-AC; SAEB-T15

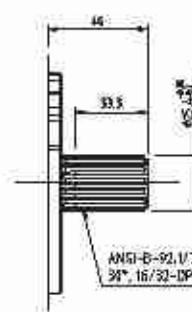

Type flange SAEB-AC  
Flangia tipo SAEB-AC

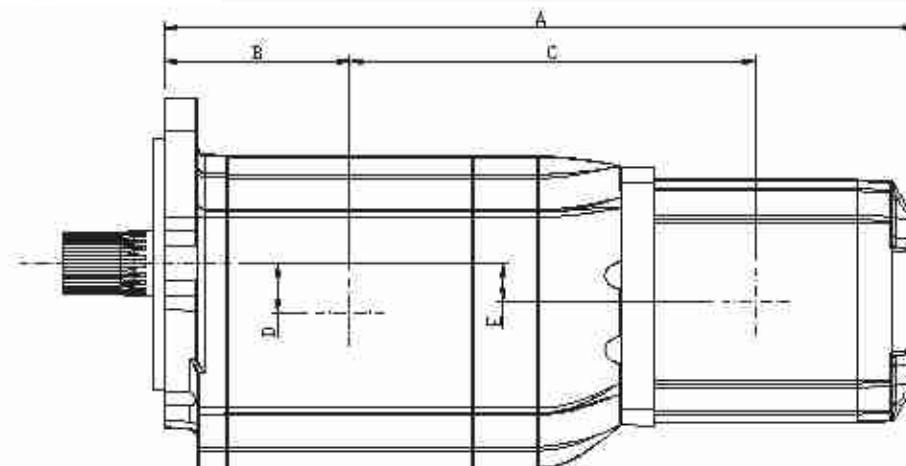

Type flange SAEB-T15  
Flangia tipo SAEB-T15

Type shaft SAEB-AC  
Albero tipo SAEB-AC  
Max torque / Coppia max: 550 Nm

Type shaft SAEB-T15  
Albero tipo SAEB-T15  
Max torque / Coppia max: 700 Nm

### Available flanges and shafts for GR72

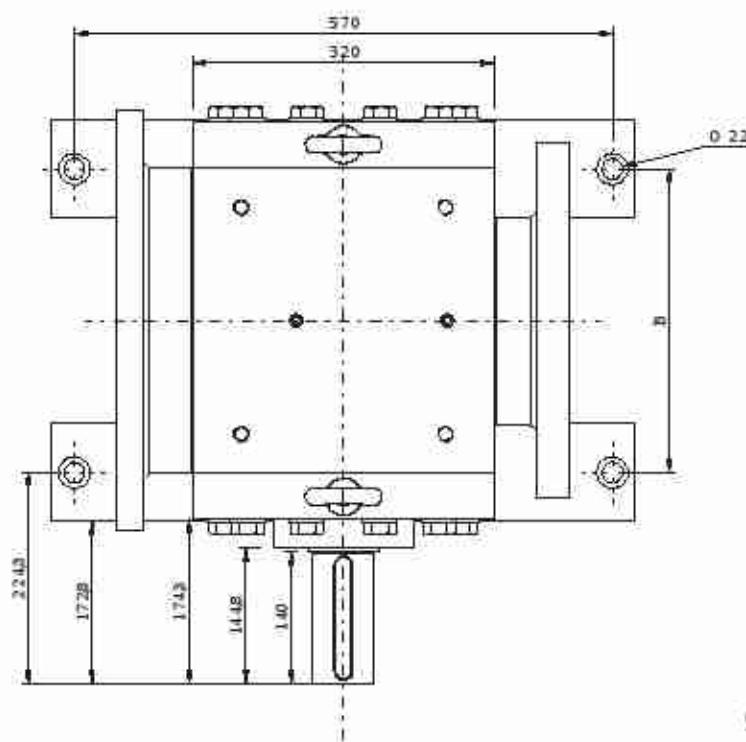

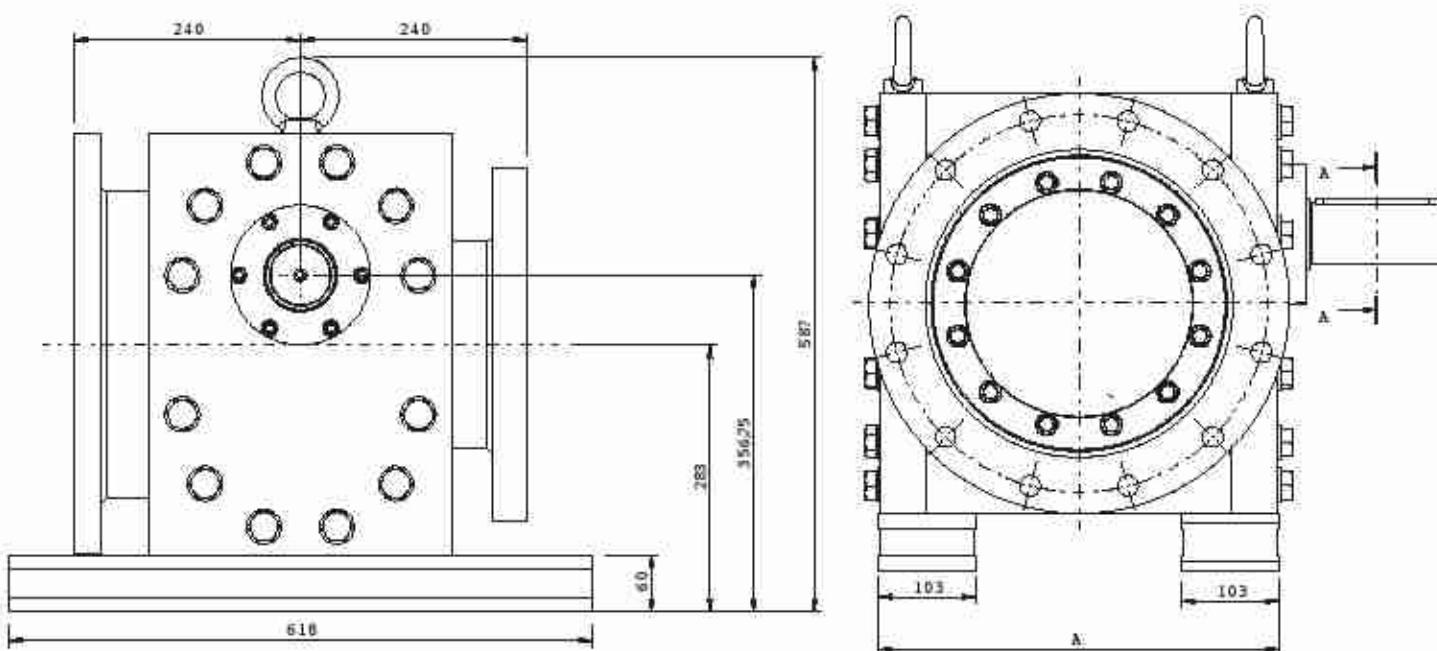

Flange ed alberi disponibili per GR72: SAED-23T

Type flange SAED-23T  
Flangia tipo SAED-23T

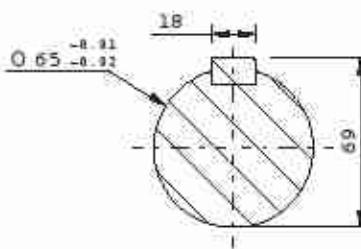

Type flange SAED-23T  
Flangia tipo SAED-23T  
Max torque / Coppia max 1200 Nm

**Continuum® pump** is a very flexible pump capable to meet the most different and demanding request of customization. Below an example of **Continuum® pump** designed and manufactured according to very special request for oil lubrication in the hydropower and power generation applications.

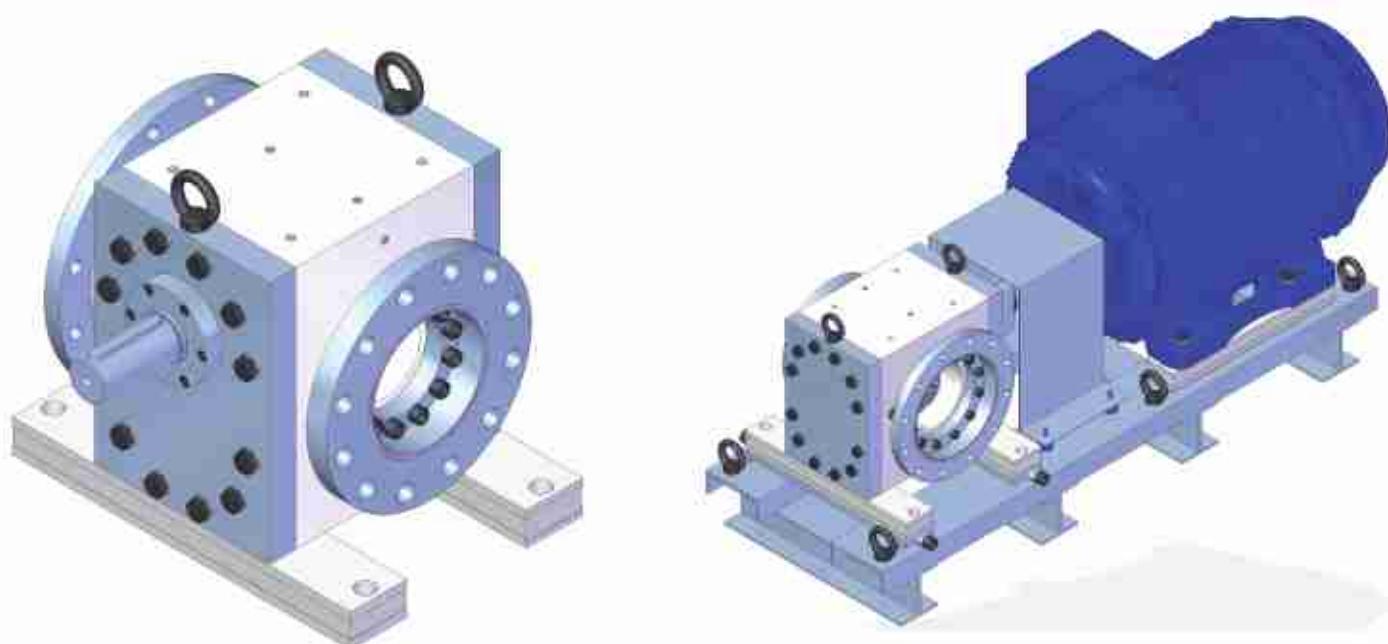

SECTION A-A

| PUMP         | A        | B        |
|--------------|----------|----------|
| GR180-2730cc | 424,4 mm | 321,4 mm |
| GR180-4100cc | 516,4 mm | 413,4 mm |
| GR180-4900cc | 534,8 mm | 431,8 mm |

## Technical characteristics

| <i>Modelli</i>  |   |                                     |
|---|---|-------------------------------------|
| <b>Displacements</b><br><i>Cilindrate</i>               | 2730cc - 4100cc - 4400cc                |                                     |
| <b>Shaft speed</b><br><i>Velocità di rotazione</i>      | Up to 1.500 RPM<br>Fino a 1.500 RPM     |                                     |
| <b>Flows</b><br><i>Portate</i>                          | Up to 6.000 L/min<br>Fino a 6.000 L/min |                                     |
| <b>Operating pressure</b><br><i>Pressione operativa</i> | Up to 50 bar<br>Fino a 50 bar           |                                     |
| <b>Fluids</b><br><i>Fluidi</i>                          | - Mineral oil<br>- Synthetic oil        | - Olio minerale<br>- Olio sintetico |
